

## ***Direct and indirect work with marginalised groups***

There is no abstract on this subject, since the invited expert from France did not consider himself legitimate to develop something pertinent on that topic that would add any extra value to existing toolkits that have been developed and used by NGO's or governmental bodies in France.

e.g. "AFIP" <http://www.afip.asso.fr/> on social economy in the agricultural sector and

"Nos Quartiers ont des Talents" <http://www.nosquartiers-talents.com/> on apprenticeship and training for young people.
